As all we know, the academic activities during the covid pandemic of last two years were organized in online. Our teachers were trying their maximum to bring up the children as the best as we dreamed of. Along with their academic, we were trying to prepare the children as the best citizens. By the academic inputs and step by step preparation, our children could score most beautiful scholarship, admission in good colleges for professional courses in most popular colleges etc. Many of the children even from secondary school able to get scholarship from the Government and able to get admitted in vocational higher secondary schools. We felt very proud to sending out the children to such schools with scholarships and support of Government. Sure, these kids can have employment and earning immediately after completing their courses.

These all could happen with your supports only. Once these children get employment, certainly his family and by that there will be lot of changes in the society and that is the real target and aim of our gathering. Thank you for that and IT'S ONLY YOU, the reason for these changes going to happen in the community.

Once again thank you very much for serving the poor and needy. We are fortunate and blessed to work with you for the mission of educating the young once. We would like to remain as supporting hands of you to reach out the needy in the community. We are extending our prayer and best wishes.
